ABOUT UNIVERSITY

Maharaja Suheldev University, Azamgarh, was established by the Government of Uttar Pradesh on August 5, 2019, through a gazette notification. This state university has a residential campus in Azamgarh and oversees affiliated colleges in Azamgarh and Mau districts, which were previously under Veer Bahadur Singh Purvanchal University, Jaunpur. Azamgarh, a culturally rich and historic city, serves as the district and commissionerate headquarters, located 260 km east of Lucknow and well-connected via the Purvanchal Expressway, Gorakhpur-Varanasi Highway, and Azamgarh-Ballia Highway.

The university is residential and affiliating in nature, with facilities such as administrative buildings, hostels, laboratories, and infrastructure including a police outpost, power station, and STP plant. Two large academic buildings cater to students, supported by separate hostels for men and women.

The institution is committed to providing a disciplined, green, and secure environment for learning and research. It prioritizes transparency, quality, digitalization, and timeliness in its academic and administrative functions. Despite limited resources and staff, the university has achieved significant progress since its establishment.

CONCEPT NOTE

As India celebrates its 100th year of independence in 2047, the vision of a developed, strong and inclusive nation emphasizes progress and a forward-looking foundation. This transformation centers on economic growth, social equity, technological innovation and environmental sustainability.

India envisions becoming a global leader through industrial development, a robust digital economy and advances in clean energy, artificial intelligence and biotechnology. Social equity will be prioritized by ensuring universal healthcare, quality education, skill development and a strong commitment to gender equality and women's empowerment. Technological strides in AI, quantum computing and smart city initiatives will revolutionize public services, fostering efficiency and accessibility. Environmental sustainability is key, with a focus on renewable energy, sustainable agriculture and green technologies to balance growth and ecological preservation. On the global stage, India aims to enhance its influence through strategic partnerships, leadership in international trade and active roles in multilateral forums like the UN, G20 and BRICS. Governance in 2047 will be transparent, efficient and citizen-centric, leveraging AI and data analytics for improved decision-making and public service delivery. This harmonization of economic growth, technological progress, social equity and sustainable governance will define the India of the future.

To support this vision, Department of Political Science, Maharaja Suhel Dev University is hosting a one-day seminar titled "Developed India @ 2047: Towards a Strong, Prosperous, and Inclusive India." The event will gather experts, thought leaders and young minds to explore strategies for achieving the ambitious Viksit Bharat@2047 vision, contributing to India's development journey.

THEME

Developed India @ 2047 : Towards a Strong, Prosperous, and Inclusive India

SUB- THEME

➤ Developed India & Sustainable Development Goals
➤ Developed India & the Challenges of Cybercrime
➤ Developed India & Indian Knowledge Tradition
